

# A FREE PERSON !

The covid pandemic has killed millions of people.

But I refused to wear a mask.  
Because I couldn't breathe comfortably.  
And this virus was chickenshit anyway...  
And because I'm a FREE person.

I didn't care about social distancing.  
Because I wanted to keep partying with my pals.  
And since the virus wasn't dyed in yellow it was invisible...  
And because I'm a FREE person.

I didn't get a vaccine.  
Because the (new) government was putting the pressure on me.  
And I wanted to decide for myself.  
And it was all a conspiracy organized by the big pharma.  
And because I'm a FREE person.

I marched against the introduction of a health pass.  
Because I loathe governmental regulations.  
Except when the State distributes billions in financial aid.  
And because I'm a FREE person.

I got the virus and I spread it all around me, contaminating relatives,  
friends and neighbours.  
Because I'm a selfish twerp.  
Because I didn't realize that *the only free element was the virus itself*.  
Because I'm a FREE person.

Today I'm stuck on a bed in an ICU,  
With a tube down my gob.  
And I may well kick the bucket before my time...  
But, hey, I don't give a damn, because I'm gonna die a FREE person !
